*Re: Application by Verizon New England for Authorization To Provide In-Region,
InterLATA Services in Maine, CC Docket No. 02-61*

Dear Ms. Dortch:

The Commission staff has asked Verizon to identify the application fee, space preparation charges and floor space charges for cageless collocation in Maine. The staff also asked Verizon to identify the Maine application fee, space preparation charges, space construction charges, and floor space charges for caged (also referred to as “physical”) collocation. Lastly, the staff asked Verizon to identify the recurring and non-recurring charges that would apply to typical caged and cageless collocation arrangements.

Attachment A contains a listing of all of the non-recurring and recurring charges associated with a typical Maine caged arrangement. As shown in Attachment A, the application fee for caged collocation is 25 percent of the non-recurring rate (“NRC”) for the space conditioning and multiplexing node. This “application fee” is credited to the CLEC as partial payment of the space conditioning and multiplexing node NRC. In that sense, the application fee is actually a deposit on the space conditioning and multiplexing node NRC. The space preparation, space construction, and floor space charges for caged collocation are all reflected in the space conditioning and multiplexing node NRC.

Attachment B contains all of the non-recurring and recurring charges associated with a typical Maine cageless collocation arrangement. The application fee for cageless collocation is

\$2903.34. The space preparation charges and floor space charges for cageless collocation are reflected in the recurring rate for space and conditioning listed in Attachment B.

The twenty-page limit does not apply as set forth in DA 02-684. Please let me know if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Telli". The signature is written in a cursive, flowing style.
